

Software for devices “TKA-PKM” (05, 08, 09)

Software for devices “TKA-PKM” (05, 08, 09) (data carrier with software, USB AB communication cable).

SYSTEM REQUIREMENTS

- IBM-compatible computer;
- operating system Win98 / XP / Vista / Seven / 10;
- free USB or COM port.

Equipping the USB interface allows you to: expand the capabilities of the device without prejudice to the time of information retrieval, abandon paper media while reading the microclimate parameters.

Devices of the TKA-PKM models (05, 08, 09) can be connected via a half-duplex synchronous serial interface (USB – virtual COM port) to a computer or other controller. The instruments transmit information to the serial port in text format using the OEM 866 encoding.

- [Download virtual COM port driver for Win XP](#)
- [General information about the terminal program SPTerminal \(readme\)](#)
